

Super Sanitary Conveyor System designed for easy inspection and fast, thorough sanitizing

Shaft mount motor reducer used on drive system doesn't need motor mounts, chain or belt guards, sprockets or drive sleeves, and can be disassembled in 30 seconds with only one tool. This Super Sanitary drive design is highly efficient and the lube systems are "lubed for life," making them virtually maintenance free.

Conveyor idler-end can be disassembled without tools. The idler is one piece construction and never needs lubrication making it virtually maintenance free.

One-piece UHMW rollers are set in locking slots and can be removed in seconds, without tools, for easy inspection and sanitation of conveyor chain, rollers and underside. Rollers feature unique one-piece construction and require virtually no maintenance.

The infinitely adjustable floor-foot design provides point contact with the floor. Combined with sealed construction and a non-threaded rod, the design simplifies sanitation and maintenance.

Single piece welded frame system eliminates all fasteners and the sanitation risks they cause. Chain way and guide rails can be removed in seconds, without tools, for easy clean up and maintenance.

Super Sanitary dramatically reduces downtime and cuts the risk of contamination

Now you can be one step ahead of USDA sanitation regulations with the new Super Sanitary Conveyor System. Super Sanitary is uniquely engineered to eliminate pockets so cleaning systems can remove harmful bacteria. All mating parts are welded, even the legs. No bolts are used anywhere so there are fewer parts to keep clean. Super Sanitary can be disassembled with one wrench for fast, thorough sanitizing. You can even take the drive system off and put it back on in less than 60 seconds.

With Super Sanitary, you don't have to worry about inspections either. Any part that needs to be checked can be easily removed with one tool.

Super Sanitary is designed to help you meet tougher USDA sanitizing requirements while greatly reducing maintenance time. Find out how Super Sanitary conveyors can work in your processing plant. Contact us for your free demo CD at 1-920-235-0454 or e-mail us at mail@keenline.com.
